Ph : 9177 286 794

Professional Summary

Manual Test Engineer with around 3 years of experience QA at Capgemini India and Fuerte Solutions. Skilled in Agile processes, JIRA, with a strong focus on manual testing and a basic understanding of automation tools. Committed to delivering high-quality software through detailed test planning and execution.

Project Details

Fuerte Solutions Private Limited

Software test Engineer

June 2024 – Present

1. Cloud Adword Application

Type   **:** Web and Mobile Application

Description : Cloud Adword is a digital signage management application that allows users to manage advertisements remotely across multiple screens. The system includes a web application for admin management and a mobile APK for screen display and monitoring.

Responsibilities:

- Tested both web and mobile versions for proper content display and synchronization.
- Performed APK installation and validation on multiple devices.
- Verified screen connectivity, content updates, and real-time synchronization between web and mobile applications.
- Conducted UI and functional testing to ensure smooth content scheduling and playback.
- The Video Wall application enables the control of multiple display screens using a single device, ensuring synchronized playback across all connected screens. Participated in regression and smoke testing during new APK releases.

2. Resflo Application

Type   **:** Web Application and Mobile

Description : Resflo is a ticketing and workflow management tool designed to help support teams track and resolve client issues efficiently.

Responsibilities:

- Tested modules such as ticket creation, assignment, status tracking, and closure
- Validated email notifications, priority settings, and role-based access controls.
- Ensured the correct workflow of ticket escalation.
- Performed UI validation, form validation, and end-to-end functionality checks.
- Identified and reported defects in JIRA, retested after fixes, and updated regression test cases.
- Participated in sanity testing after each deployment to ensure system stability.

3. Confess Application

Type   **:** Android Mobile Application and IOS

Description : Confess is a student-based social networking app that enables students to join schools, share confessions, and chat with friends securely.

Responsibilities:

- Tested student registration, admin approval, and verification flow.
- Verified school join requests, friend requests, and chat functionality.
- Tested admin module for user approval/rejection and report management.
- Performed UI, functional, and usability testing across multiple Android versions.
- Validated push notifications, data sync, and error handling scenarios.
- Conducted smoke, sanity, and regression testing after new app builds.

4. Prodisis Website

Type   **:** Static Web Application

Description : Prodisis is a corporate informational website designed to showcase company services and product details.

Responsibilities:

- Performed UI testing, content verification, and spelling/grammar checks.
- Tested page navigation, image loading, and broken links.
- Verified dropdowns, hyperlinks, and form submissions.
- Ensured the website was cross-browser compatible (Chrome, Edge, Firefox).
- Reported UI defects related to alignment, color consistency, and responsiveness.

Capgemini

Software test Engineer

Oct 2023 – Jan 2024

1. University Alumni Management System

Description : The University Alumni Management System is a web-based platform designed to strengthen the connection between students, alumni, and administrators. It enables continuous communication, knowledge sharing, and career support through a centralized portal. The system includes three main modules — Admin, Alumni, and Student — each with distinct roles and functionalities.

Responsibilities:

- Alumni Module: Allows alumni to register using details like university ID, department, current company, designation, experience, and salary. They can log in to post job updates, share technical advice, upload materials, and update or delete their personal and professional details.
- Student Module: Enables students to register and view alumni profiles, job posts, and career opportunities related to their department. Students can also update their own contact information.
- Admin Module: Provides administrators the ability to add, modify, delete, and view records in both the alumni and student databases. Admins can also organize alumni–student interactions, view scheduled sessions, and manage department-wise connections (CSE, EEE, ECE, MECH, CIVIL).

Skills :

- Manual testing, Test Plan, Test Design, Test execution, Functional Testing, Defect Testing
- Android Box Testing, Web Application Testing, Mobile Testing, Static website Testing, OS Testing, Video Wall Testing.

Certificates:

- Completed certification on Agile methodology job simulation by - COGNIZANT
- Completed certification on Agile job Simulation by- JPMORGAN CHASE & CO
- Completed certification on Manual Testing on Udemy-E learning Platform.

Education :

- B. Tech Vignan's Nirula Institute of Technology with cgpa 8.05
  07/2018 – 06/2022 Guntur, India
