🪪 Profile

Manual Test Engineer with 2.5 years of experience in QA at Capgemini India and Fuerte Solutions. Skilled in Agile processes, JIRA, with a strong focus on manual testing and a basic understanding of automation tools. Committed to delivering high-quality software through detailed test planning and execution.

🎓 Education

B. Tech Vignan's Nirula Institute of Technology with cgpa 8.05   07/2018 – 06/2022
Guntur, India

💼 Professional Experience

Fuerte Solutions Private Limited   06/2024 –present
Software test Engineer   Hyderabad, India
Currently at **Fuerte Solutions**, responsible for end-to-end testing of web and mobile applications, conducted in-depth testing of screen content for digital displays and Android box validation for remote access functionality and experienced in OS-level testing, video wall testing, and ensuring product quality across multiple environments.
Strong communicator with a proactive approach to identifying risks, reporting testing progress, and aligning QA efforts with business goals. Passionate about delivering high-quality software products through collaborative teamwork and continuous improvement.

Capgemini
Associate 1   10/2022 – 01/2024
 At **Capgemini**, lead a training project to develop an Alumni Management   Bangalore, India
System, collaborating closely with cross-functional teams to define requirements, plan sprints, and conduct stand-up meetings. Applied Agile best practices using JIRA, and executed comprehensive test strategies including test case design, test plan creation, and execution using Zephyr. Integrated testing activities into CI/CD pipelines using Jenkins, ensuring release stability through regular regression and smoke testing.
